UNITED STATES DEPARTMENT OF AGRICULTURE

MAY 1969

## PUBLICATIONS RECEIVED DURING MARCH-APRIL 1969

### BULLETIN OF THE MONTH

#### Pork in Family Meals: A Guide for Consumers Home and Garden Bulletin No. 160

This bulletin will help you identify fresh and cured pork cuts in retail markets. It gives tips on how to select good-quality, how to estimate quantity needed, and how to store properly. Directions and timetables for cooking and recipes are included, as well as illustrations of various cuts of pork.

### FARMERS' BULLETINS

**Growing cauliflower and broccoli.** (F 2239) 12 p. 15¢.

Describes the varieties from earliest to latest. Planting, fertilizing, harvesting and packing procedures are explained. The bulletin also tells how to blanch cauliflower. Insects and diseases which destroy cauliflower and broccoli are described and preventive measures are outlined.

**Preventing and controlling internal parasites of hogs.** (F 2240) 36 p. 20¢.

This bulletin briefly describes and discusses the common parasites in hogs—roundworms, tapeworms, flukes, and protozoa. It illustrates infestations of parasites in the internal organs and also shows life cycles of common parasites. It provides methods of prevention, control, and—when practical—suggestions for treatment.

### LEAFLETS

**Cattle lice: How to control them.** (L 456) 8 p. 10¢.

This leaflet has been revised to bring

up to date insecticide recommendations for the control of cattle lice. It describes the lice, lists the insecticides and gives instructions on how to use them, and information on a low-cost rubbing device.

### HOME AND GARDEN BULLETINS

**Ants in the home and garden: How to control them.** (G 28) 8 p. 10¢.

This bulletin tells how to locate the ant nest in the home, in lawns, and in gardens. It explains how to get rid of infestations and prevent reinfestations by the proper application of chlordane and other insecticides. Shows the kind of equipment needed for applying insecticides and explains precautions that should be taken.

**Controlling the Japanese beetle.** (G 159) 16 p. 25¢.

This bulletin discusses the description and habits of the Japanese beetle, the damage it does, and how it may be controlled.

**Pork in family meals: A guide for consumers.** (G 160) 28 p. 20¢.

See Bulletin of the Month.

**Apples in appealing ways.** (G 161) 16 p. 15¢.

This publication gives suggestions for buying and storing apples, and recipes for using them in a variety of ways.

**Minigardens for vegetables.** (G 163) 12 p. 15¢.

All you need as a place to start a minigarden is a windowsill, a balcony, or a doorstep. This bulletin describes the basic materials required—suitable containers of various sizes, synthetic soil, and vegetable seeds. Planting and harveting dates, cultural practices, light requirements, and number of days between seeding and harvesting are discussed.

**Pruning ornamental shrubs and vines.** (G 165) 16 p. 10¢.

This bulletin lists the most commonly grown shrubs and vines that need pruning. Describes how they should be treated. Information on various tools is included.

**How to buy meat for your freezer.** (G 166) 28 p. 20¢.

Bulletin describes the alternatives in buying meat by the carcass, wholesale cuts, or retail cuts. It discusses kind of cuts, how much of each can be expected from a carcass, and how to compare costs. Charts show the different cuts from a beef, lamb, and pork carcass.

## MOTION PICTURES

For loan or purchase information write to the Motion Picture Service, Office of Information, D. C. 20250. Prints are available for loan from land-grant university film libraries and other universities cooperating with USDA.

**Who shall reap?** Sound, color, 16-mm., 28 minutes.

Dramatizes the never-ending struggle of farmers the world over to protect their crops and livestock from the ravages of insects, diseases, weeds, and other pests. It contrasts the primitive ineffectual pest control methods still in use in many parts of the world with sophisticated modern control technology developed in this country and the substantial benefits to the consumer and to the nation resulting from the use of this technology. The film focuses on current research efforts to develop even more efficient, safer methods of protecting food, fiber, and forests from pests to meet the needs of an exploding world population. **Maintaining garden freshness in fruits and vegetables.** C-48. 29 frames. Mounted slide set \$8.00. Filmstrip \$5.50.

Shows the effect of temperature, moisture, and handling practices on fresh fruit and vegetable quality, including recommendations for storing, prepacking, and displaying so as to store shelf life and reduce deterioration. Covers major factors that effect quality maintenance of fruits and vegetables.

**Protect frozen foods from temperature damage.** C-70. 24 frames. Mounted slide set \$8.00. Filmstrip \$5.50.

A report of the time-temperature-tolerance project of USDA's Western Regional Research Laboratory in Albany, Calif. Reports quality changes in frozen fruits, vegetables, juices, poultry, and prepared foods under varying temperatures, and related time periods. Useful to those who manufacture, ship, store, sell, deliver, or use frozen foods and who desire to protect original quality at all times.

**Man against pests.** C-129. 66 frames. Mounted slide set \$10.50. Filmstrip \$7.50. Record \$1.00.

Throughout history pests have been a major enemy to man in his efforts to produce an adequate supply of food and fiber. This presentation gives example of the ravages of pests that have occurred throughout history, and the development of pesticides from early forms of control to today's modern scientific methods.

**Closing the gap.** C-142. 50 frames. Mounted slide set \$8.00. Filmstrip \$5.50.

The story of the basic objective of the USDA's Rural Electrification Administration is told in photographs and artwork. Tells how the REA has brought electricity to 5 million consumers through the rural electric cooperative system.

For loan or purchase information write to the Motion Picture Service, Office of Information, U.S. Department of Agriculture, Washington, D.C. 20250. Prints are available for loan from land-grant university film libraries.

**Equine Infectious Anemia (EIA).** Sound, color, 16-mm., 16¼ minutes.

This is a disease that affects horses, mules, and burros. EIA, also known as Swamp Fever, is found in all areas of the United States. Highly infectious, EIA is spread by mosquitoes, biting flies, and by use of contaminated equipment such as tack and hypodermic needles. The film clearly outlines precautionary measures and appeals to all horse owners and trainers to use utmost care with their animals. Produced in cooperation with Texas A&M University. TV cleared.

**Man against fire.** Sound, color, 16-mm., 28 minutes.

The story of man's fight to save forest resources from destruction by wildfire—by the use of his brain power and experience; muscle power and stamina, and technology, and strategy. Federal, State, and local cooperative fire control measures protect our Nation's water supply, timber, wildlife, recreation areas, and scenic wonders of the forests. TV cleared.

UNITED STATES DEPARTMENT OF AGRICULTURE

NOVEMBER 1969

## PUBLICATIONS RECEIVED DURING SEPTEMBER-OCTOBER 1969

### BULLETIN OF THE MONTH

#### How to Buy Lawn Seed. Home and Garden Bulletin No. 169

This publication describes the things you should know about selecting seed that will, with good care, grow and develop into a successful lawn. It also outlines the most frequently used kinds of lawn seeds that are available, the areas where they are best grown, and some of their characteristics.

### FARMERS' BULLETINS

**The boll weevil . . . how to control it.** (F 2147) 12 p. 10¢.

This revised bulletin describes the boll weevil, its stages of development, and the damage it does. It discusses the control of the insect by cultural practices and by the use of insecticides.

**Housing and equipment for sheep.** (F 2242) 12 p. 10¢.

Describes and illustrates housing and equipment needed to raise a flock of sheep. Both conventional and slatted floor housing are included. Feeding equipment and many other items are discussed briefly in this bulletin.

### LEAFLETS

**Cockroaches: How to control them.** (L 430) 8 p. 10¢.

This leaflet gives pointers on the prevention and control of the kind of cockroaches that attack homes and buildings. The kinds of insecticidal dusts and sprays to use are included as well as their application. Other methods of control are also discussed along with

special instructions for controlling resistant roaches.

**Horse bots: How to control them.** (L 450) 8 p. 10¢.

This revised leaflet describes three species of horse bot flies that are serious pests in this country—the common bot fly, the throat bot fly, and the nose bot fly. It discusses the kinds of damage caused by the flies and their larvae, and gives detailed instructions for control of bot flies by external and internal treatment of horses.

**The common liver fluke in sheep.** (L 492) 8 p. 10¢.

This revised leaflet describes the common liver fluke and how it infects sheep, areas where flukes occur, and how flukes are diagnosed. It also gives suggestions for treatment and control of flukes and their intermediate hosts.

**Controlling white-fringed beetles.** (L 550) 8 p. 20¢.

This bulletin tells how to control the white-fringed beetle. It describes methods of cultural control such as the use of crop rotations, and chemical control through the effective use of insecticides.

It also tells how you can help prevent the spread of white-fringed beetles by finding and reporting infestations to agricultural officials.

# Bimonthly List of PUBLICATIONS AND MOTION PICTURES

UNITED STATES DEPARTMENT OF AGRICULTURE

JANUARY 1970

PUBLICATIONS RECEIVED DURING NOVEMBER-DECEMBER 1969

## BULLETIN OF THE MONTH

**Meat and Poultry: Standards for You.**

Home and Garden Bulletin No. 171.

Describes how Federal inspection of meat and poultry products helps assure the consumer of wholesomeness and uniformity. The USDA's Consumer and Marketing Service sets standards and examines formulas for products. The standards describe what is to be in the products, including the minimum and maximum amounts of water and other ingredients.

## FARMERS' BULLETINS

**Grasshopper control.** (F 2193) 11 p. 10¢.

Discusses controlling grasshoppers on farms and ranches by using insecticides, including dosages and application procedures. Gives methods of soil tillage and irrigation to control grasshopper infestation.

**Controlling dodder in alfalfa.** (F 2211) 16 p. 10¢

Spraying with herbicides, burning, cutting, and a combination of methods, are some of the control practices for dodder discussed in this revised bulletin.

## LEAFLETS

**Trout farming: Could trout farming be profitable for you?** (L 552) 8 p. 10¢.

Information for farmers and ranchers on how to plan and manage ponds for commercial production of trout for food and recreation.

**Controlling insects in farm-stored grain.** (L 553) 8 p. 10¢.

This leaflet gives instructions for the cleaning, spraying, and treatment of grain bins, to control insects. It gives instruction for the use of insecticide sprays or dusts, and list precautions in the use of pesticides.

## HOME AND GARDEN BULLETINS

**Money-saving main dishes.** (G 43) 48 p. 30¢.

This revised bulletin gives a wide choice of economical meat, poultry, and fish recipes, plus main-dish combination foods, each of which provides one-fourth or more of the days' protein requirements. Buying and management tips, time-saving methods and well balanced menus are also included.

**Meat and poultry: Wholesome for you.** (G 170) Folder. 10¢.

Explains how the meat and poultry inspection program assures wholesomeness, and protects the consumer. Also

tells how consumers can keep products wholesome after they buy them. Informative USDA approved labels, assure accurate descriptions of products. Also provides a list of guidelines for use in buying, handling, storing, and cooking meat and poultry products.

**Meat and poultry: Standards for you.** (G 171) Folder. 10¢.

See Bulletin of the Month.

**Meat and poultry: Labeled for you.** (G 172) Folder. 10¢.

This pamphlet advises consumers to read the label carefully before buying meat and poultry products. If the product has been Federally inspected, you can be sure of the accuracy of the label. Labels approved by the USDA include such information as an accurate name and description of the product, list of ingredients, net weight of contents, and storage and cooking instructions, if needed. Explains how best to choose products and how to store them. Tells how the consumer can have a voice in the new labeling requirements that are constantly being proposed.

**Watershed projects for protection and profit.** No. C-128. Released 1966. 55 frames. Mounted slide set \$9.00. Filmstrip \$6.50.

Water is essential to the existence of all forms of life. But too much water at one time can bring destruction of life, property, and resources. This presentation shows how proper conservation practices can greatly limit the ravages of uncontrolled water, and at the same time make additional water supplies available for farming . . . for our cities . . . and for our industries.

**Finding the best protected part of your home.** No. A-36. Released 1968. 29 frames. Mounted slide set \$8.00.

Produced by the USDA's Federal Extension Service in cooperation with the Office of Civil Defense, this show tells how to locate the portion of the home which affords the best protection against the effects of radiation fallout. The set, and introduction to a more intensive workshop of fallout shelter analysis for groups interested in more detail, explains the basic elements of protection—distance from fallout and shielding by materials.
